CUSTOMER JOURNEY MAP

Project Name: Implement Client Script & UL Policy
Project ID: SWTID-2026-3268

Stage	Customer Goal	Customer Actions	Touchpoints	Pain Points	Expected Outcome
1. Awareness	Understand the need for the client script and UL policy.	Receives project information and reviews the purpose.	Project briefing, documentation, stakeholder communication.	Unclear scope or terminology.	Clear understanding of the project and policy.
2. Requirement Review	Know what is required and what constraints apply.	Reviews requirements, use cases, and policy expectations.	Requirements document, meetings, review sessions.	Missing or ambiguous requirements.	Agreed and traceable requirements.
3. Implementation	Have the client script implemented correctly.	Tests or validates the implementation with the project team.	Client environment, script, implementation support.	Integration issues, unexpected behavior, compatibility concerns.	Functional implementation aligned with requirements.
4. Validation	Confirm compliance and expected behavior.	Runs test cases, checks policy alignment, and reports issues.	Test results, validation checklist, issue tracking.	Incomplete testing or unresolved defects.	Validated and documented results.
5. Adoption	Use the solution confidently in the intended workflow.	Uses the implemented script and follows the UL policy.	Production workflow, guidance, support documentation.	Lack of guidance or support.	Smooth adoption and consistent usage.
6. Feedback & Improvement	Maintain reliable and useful implementation.	Provides feedback and identifies improvement opportunities.	Support channel, reviews, feedback process.	Slow issue resolution or unclear ownership.	Continuous improvement and maintainability.

Journey Objective: Provide a clear view of the customer experience from initial awareness through implementation, validation, adoption, and continuous improvement.
