NO. OF FUNCTIONAL FEATURES INCLUDED IN THE SOLUTION

Date	15 March 2024	**Team ID**	SWTID-2026-3268
Project Name	Implement Client Script & UI Policy (Incident)	**Maximum Marks**	5 Marks

Functional Features Overview

The following feature list is a proposed project breakdown based on the project title. Confirm each item against the actual ServiceNow configuration before marking it Done or Tested.

S.No.	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	Incident form field behavior	Show or hide selected fields based on the configured incident condition.	Incident form / UI Policy	Proposed	
2	Mandatory field control	Set selected fields as mandatory when the policy condition is met.	UI Policy / UI Policy Actions	Proposed	
3	Conditional field read-only behavior	Make selected fields read-only when the configured condition applies.	UI Policy / UI Policy Actions	Proposed	
4	Client-side form validation	Check required incident information before submission.	Client Script (onSubmit)	Proposed	
5	Priority-based validation	Apply additional validation when priority is Critical, if required by project rules.	Client Script	Proposed	
6	User guidance message	Display a helpful message when required information is missing or a condition is triggered.	Client Script / Form message	Proposed	
7	Incident form load behavior	Initialize client-side behavior when the Incident form opens.	Client Script (onLoad)	Proposed	
8	Testing and verification	Test policy actions and script behavior with representative incident records.	Incident form / test cases	Pending verification	

Feature Summary

Metric	Count / Value
Total Features Planned	8 (proposed)
Total Features Implemented	Not confirmed — verify in the ServiceNow instance
Core / Must-Have Features	Incident form behavior, mandatory field control, client-side validation
Additional / Nice-to-Have Features	Read-only behavior, user guidance message, priority-based validation
Features Tested & Verified	Not confirmed — testing evidence required

Feature Category Breakdown

S.No.	Category	Features in Category	Example Features
1	User Interface (UI)	3	Field visibility, mandatory indicators, read-only fields, form messages
2	Backend / Logic	3	onLoad initialization, onSubmit validation, priority condition logic
3	Database / Storage	0 directly specified	Incident records use ServiceNow platform storage; no custom storage feature specified
4	API / Integration	0 specified	No external API/integration described in the supplied project title
5	Security / Authentication	Platform-provided	ServiceNow sign-in and access controls; no custom security feature specified

Note: The uploaded template does not provide the actual configured features or implementation evidence. Feature names and counts above are suggested based on the project title; update status/counts and marks contribution after checking the team's completed work.
