Demonstration of Proposed Features

Date	15 March 2026	**Team ID**	SWTID-2026-3268
Project Name	Implement Client Script & UI Policy (Incident)	**Maximum Marks**	1 Mark

Demonstration of Proposed Features:
This document captures all the features proposed for the project “Implement Client Script & UI Policy (Incident)” and records whether each feature was successfully implemented and demonstrated.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Incident Form Field Validation	Client Script validates Incident form fields and checks required input before submission.	Implemented	Yes	Validation tested successfully.
2	Auto-population of Incident Fields	Client Script automatically sets or updates Incident field values based on user input.	Implemented	Yes	Auto-population demonstrated.
3	Dynamic Field Visibility	UI Policy shows or hides relevant Incident fields according to selected field values.	Implemented	Yes	Dynamic visibility works as expected.
4	Field Mandatory Control	UI Policy makes relevant Incident fields mandatory when the defined conditions are satisfied.	Implemented	Yes	Mandatory condition demonstrated.
5	Field Read-only Control	UI Policy makes selected Incident fields read-only when the specified condition is met.	Implemented	Yes	Read-only behavior verified.
6	Incident Priority / Impact Handling	Client Script and UI Policy apply the defined field behavior based on Incident priority or impact conditions.	Implemented	Yes	Condition-based behavior demonstrated.

Feature Implementation Summary		
Total Features Proposed	6	features
Total Features Implemented	6	features
Total Features Demonstrated	6	features
Overall Implementation Rate (%)	100%
